What was your biggest fear before hiring All-Ways Accessible? Did it come true, and if not, what happened instead?

Perhaps that I would not feel comfortable with the elevator or that I would not understand how to use it. Best. Also if my price initials, techs, and finish. He put me totally at ease with the equipment.

What, specifically, was your favorite part of getting your Lift Installation, and why?

I was all a good experience in sales person and installers were both great, took their time, and answered all of my questions. 5 feet less to me st. 14 feet in height with it by the time I left my house.
